## PROFILE

As a Full Stack Engineer, I bring expertise in UI and backend development, excel in agile environments, and have strong CI/CD experience with Jenkins pipelines. I'm highly skilled in teamwork, communication, and consistently meeting deadlines.

## EDUCATION

**[2024]**  
**Master's in Computer Science, Artificial Intelligence and Project Management**  
*Université Saint-Joseph de Beyrouth*

**[2022]**  
**Bachelor's in Computer Science**  
*Université Saint-Joseph de Beyrouth*

## WORK EXPERIENCE

**Liaison International (April 2022 - Present)**  
**Full Stack Engineer**

- Developed and maintained user interfaces with React.js and Angular.js for a complex educational platform.
- Designed high-performance web applications and REST APIs using Java and JEE technologies.
- Debugged and fixed issues post-feature implementation to ensure system stability.
- Wrote unit and API integration tests to ensure code quality and maximize test coverage.
- Managed deployments using GitHub and delivered features on schedule with Agile methodologies.

**I-Stay (January 2022 - March 2022)**  
**Full Stack Engineer, Contract**

- Built responsive user interfaces with React.js and backend components with Java.
- Developed REST APIs for seamless frontend-backend integration.
- Resolved performance issues and collaborated with teams to meet tight deadlines.

**Potech - OB SOFT (July 2021 - October 2021)**  
**Full Stack Engineer, Freelancer**

- Created data-driven dashboards with Vue.js and D3.js.
- Developed backend features with PHP and integrated REST APIs.
- Delivered tailored technical solutions to meet client requirements.

## PROJECTS

**That's My Pet - Founder**  
**[2023 - 2024]**

Implemented a smart solution connected to a tag - useful for tracking your pet  
(<https://thatsmypet.org>)

**Bachelor's Final Project - Online Shrink**  
**[September 2021 - May 2022]**

Developing 2 interfaces (user, shrink), in which the client can book online sessions, join an online meeting, create a medical record...

**FACEBOOK - ASP.NET**  
**[2020 - 2021]**

Application connected to DataBase to add, search, send friend requests, update profile, etc...

**Server-Client - Java**  
**[2020 - 2021]**

Website based on user's login to execute different tasks through Servlets and Classes, including Security.
